

# Income of Fishing Households before and after Typhoon Haiyan

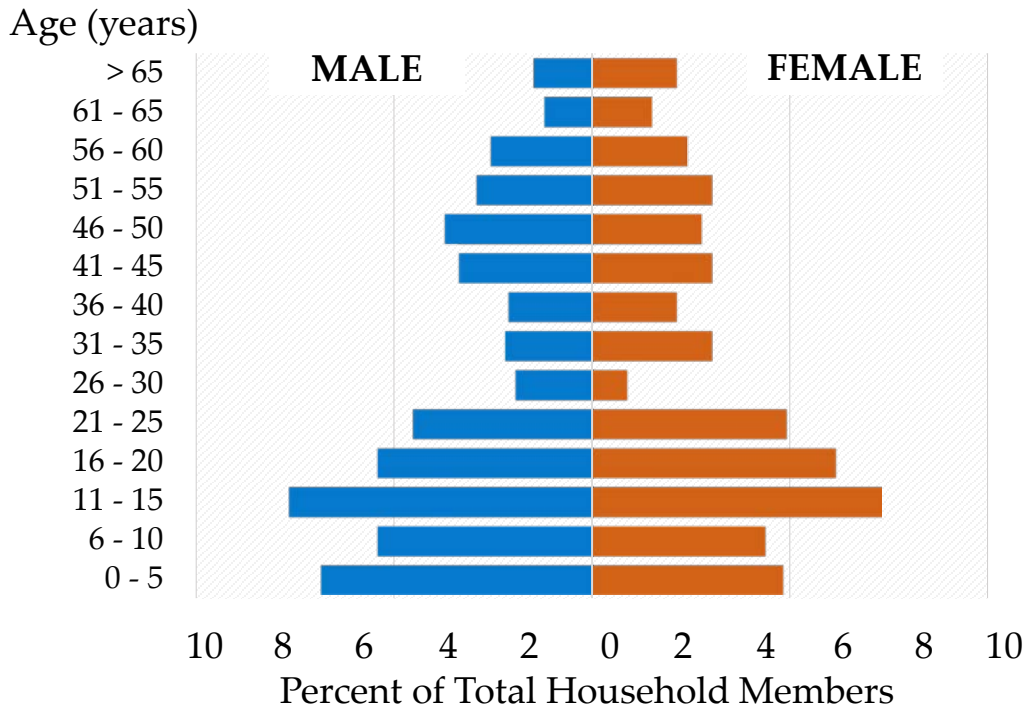

A Study on Coastal Communities of Batan and Altavas, Aklan, Philippines

Hanny John P. Mediodia, Alice Joan G. Ferrer, Leah A. Araneta,  
Gay D. Defiesta, Cristabel Rose F. Parcon, Satoshi Ishikawa

- ❖ This study compares the income of fishing households before and after the occurrence of Typhoon Haiyan in the coastal areas of Batan and Altavas, Aklan.
- ❖ Initial data gathering was done with randomly selected fishing households in 2012 using an interview schedule. A return visit to the households was done in 2014.

## RESULTS

Most households own a fishing boat.

Most households sell marine products.

Some households engage in livestock raising.

Typhoon Haiyan damaged fishing boats, fishing gears, and/or houses of more than 60 percent of the households.

Assistance received after Typhoon Haiyan were mostly Food and Water or Housing Materials. **Less than 10 percent of HHs in Batan received fishing gears and/or boat.**

61 percent of the HHs reported a reduction in total monthly household income while 68 percent reported a reduction in the monthly household income derived from fishing activities.

	Altavas	Batan	All
<b>Average Total Monthly Household Income (in USD*)</b>			
2012	154.5	155.2	154.9
2014	135.5	139.4	137.6
% Change	-12.3	-10.2	-11.2

<b>Average Monthly Income from Fishing Activities (in USD*)</b>			
2012	88.1	90.0	89.1
2014	48.3	62.3	55.9
% Change	-45.2	-30.7	-37.3
